Important Information – Please read carefully

This is a marketing communication. The following notes provide important information that should be read in connection with the information presented in the attached presentation. The “Fund” means the undertaking for collective investment in transferable securities managed by Limmat Capital Alternative Investments AG under an investment management agreement with One Fund Management S.A. The returns presented are net of all fees and expenses and assuming the reinvestment of all distributions. The returns to any specific investor will vary from the described returns based on the timing of contributions and withdrawals and any other fees applicable to each investor’s investment.

This document has been provided to you upon your explicit previous request and for informational and marketing purposes only. It is not a contractually binding document, or an information document required by any legislative provision and is not sufficient to take an investment decision. Nothing in this communication should be construed to constitute an offer to sell nor a solicitation to buy an interest in LC Equity Fund (UCITS) (the “Fund”) by anyone in any jurisdiction in which such an offer or solicitation is not authorized or to any person to whom it is unlawful to make such offer or solicitation. An offer can only be made in jurisdictions in which an offer would be lawful and only on the basis of the prospectus of the Fund (the “Prospectus”).

Please refer to and read carefully the Prospectus and the key information document (“KID”) of the Fund in their latest versions before making any final investment decisions. These documents can be obtained from the website www.fundinfo.com.

Shares have not been and will not be registered under the U.S. Securities Act of 1933, as amended (the “1933 Act”) or qualified under any applicable state securities statutes, and Shares may not be offered, sold or transferred in the United States of America (including its territories and possessions) or to or for the benefit of, directly or indirectly, any U.S. Person (as defined in the following sentence), except pursuant to registration or an exemption. In this context, a “U.S. Person” is a person who is in either of the following two categories: (a) a person included in the definition of “U.S. Person” under Rule 902 of Regulation S under the 1933 Act or (b) a person excluded from the definition of a “Non-United States Person” as used in CFTC Rule 4.7. The Fund has not been and will not be registered as an investment company under the U.S. Investment Company Act of 1940, as amended (the “1940 Act”). Shares are subject to restrictions on transferability and resale and may not be transferred or resold in the United States or to any U.S. Person except as permitted under the 1933 Act and applicable state securities laws, pursuant to registration or exemption therefrom.

The Fund is an undertaking for collective investment in transferable securities for the purpose of Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities (UCITS), as amended. One Fund Management S.A. is the management company (“Management Company”) of the Fund.

Tactical and Risk Management

Requires 10% of research resources **BUT** time well spent

	Tactical Positions 	Risk Management 
Rationale	Attractive risk/reward setups	Mitigate deep drawdowns
Characteristics	Attractive valuation Positive earnings momentum Significant upside	Asymmetric risk/reward situations
Asset classes	Single Stocks, baskets and indices	Equities, interest rates, credit
Weighting	up to 30%	up to 30%
	<p><small>U.S. MARKETS</small> JUNE 30, 2021 / 10:17 AM / UPDATED 2 YEARS AGO</p> <p>EU bank profitability jumps to 7-year high, says watchdog</p> <p><small>By Reuters Staff</small> <small>1 MIN READ</small>  </p> <p>JPMorgan upgrades Chinese stocks recently deemed 'uninvestable'</p> <p><small>Researchers take rosier view of internet companies just months after bearish call</small></p> <p><small>ENERGY</small></p> <p>Big Oil rakes in record profit haul of nearly \$200 billion, fueling calls for higher taxes</p>	

Our Value Creation Formula

Core and Tactical competing for weighting

	Core Holdings 	Tactical Holdings 	Risk Management 
Descriptions	Dominant value creators to unleash long-term compounding	Tactical investments to exploit attractive risk/reward setups	Future and options to mitigate downdrafts
Industries	Technology, health care, consumer discretionary, staples, aerospace	Industry agnostic, proximity to core companies	Equity indices, options, futures
Positions	15-20 stocks Concentration in the Top 15	~5 stocks, baskets	Up to 5 positions
Average Exposure	Greater than 70% Around 100% most of the time	Up to 30%	Up to 30%
			

Performance

Long-term goal is to outperform the MSCI World TR with mitigated² drawdowns

1) LCEU strategy was modified in Q4 2021

2) Gross figures unaudited

3) The UCITS regime requires a long bias. Our aim is to meaningfully outperform the market in a bad year to aggressively take advantage of lower and reset multiples

Research And Execution

- **Research Discipline**
Understanding growth & quality of income streams
- **Buying & Selling Discipline**
Seizing opportunities

Focus On...

What **MATTERS**

- Finding around 10-15 attractive income streams and sizing them
- **Purchase price** and expected returns
- Seeing value creation when the market does not

And not on what **DOES NOT** matter

- News flow
- What is en vogue (themes, "value" "growth", "quality", "hydrogen" etc...)
- What other people think

Tactical & Timing

- **Adapt** to evolving trends

Mitigating Drawdowns

- **Protect capital** and enhance compounding

- ?** **You say you are not a growth investor, but you sure talk about growth a lot?**
This a fair assessment. When we talk about growth, we are mainly talking about the importance of growth in value creation, this could also include a high yielding stock with an average growth rate. Similarly to growth investors, there are situations where we are willing to pay a higher multiple. In what bucket should we put cheap stocks which exhibit significant growth?
- ?** **Which company will create the most value going forward?**
On a per-share basis, the biggest value creator is likely to be found among the Magnificent 7, as they have many verticals or segments which are growing strongly. We are moving into a winner-takes-all world where a significant amount of capital outlay is required and where it will be extremely difficult to disrupt like in the past. Disregarding dramatic stock price fluctuations and not uttering a buy recommendation, TSLA is a prime candidate in Christoph's opinion. However, there is a vigorous internal debate.
- ?** **How can a two-person team seriously cover 120 companies?**
We are collaborating with some truly exceptional people whom we have known for more than a decade. Modelling, for example, is done by an outstanding analyst in Sri Lanka with impeccable credentials. When it comes to research, we focus on purchase price and expected returns rather than having very detailed models (80/20). Within our universe of winners, one generally gets to an 80% confidence level and big picture understanding in a reasonable amount of time. Purchase price matters more than forecasts!
- ?** **Why not only focus on value creation and leave out tactical and risk management? Isn't it a distraction?**
We do not think there is an inconsistency here. The goal with our tactical positions is to get it approximately right in situations with outsized return potential. We have a stringent set of criteria which need to be met.
- ?** **Why Limmat and not an index ETF, and what are you doing differently in comparison to long-only funds?**
We are not valuation agnostic and will buy, sell and size according to our expected return models. Most indices are very concentrated and sometimes go through periods of stagnation. Lastly, we have the clear ambition to minimize drawdowns to enable the portfolio to compound at higher rates. Having said that, it is difficult to argue that ETFs are not a viable alternative. Nevertheless, that still does not solve the problem of when and how to buy. Outsourcing these decisions to a one-stop shop is a smart thing to do in any case.
